IFS and BRC certification

Dear customers,
in coordination with our certification body, we had to postpone the IFS and BRC audit planned for the end of April to an earliest possible date due to the pandemic.

At the end of March, we were already forced to impose a general ban on visits and travel, as the protection of our employees is our highest priority and we could only guarantee unrestricted delivery capacity by taking such drastic measures. We did not consider an exception for the planned audits to be justifiable at that time.

Since a general relaxation of the social safety precautions only became foreseeable over the last few weeks, we are now in the process of setting a date with our certification body to do the postponed audits. All specifications, prevention and control measures have been and will of course continue to be complied with, so that our high quality standards apply without restriction, regardless of the certification date.

If you wish, we will inform you within the next 4 weeks about the concrete alternative date and send you our renewed certificates without being asked after the certification has taken place.

We hope we have acted in the interest of all our customers and thank you for your trust.

Peter Tuchel
Director and Owner
